EXPERIENCE

DAT Solutions - Interaction Designer

March 2019 - April 2020

Co-led the redesign for DAT's load board to unify a fragmented customer experience. Led discovery and brainstorming activities to create initial vision.

Contributed to building a new design system based on material.io and new branding guidelines.

Designed a new online booking feature. Worked within an engineering scrum team using beta-users' feedback to improve designs and adjust them for edge cases and errors.

Improved mobile app to include shipment editing capability. Wrote survey questions for initial requirements and worked with a product owner, engineers, and UX researcher to test and iterate.

Code for Portland - UX Design Lead

Oct 2018 - May 2019

Designed a tool to give infectious disease experts a better way to monitor social media for signs of a breakout. Led a team to address pain points using data collected from surveys, interviews, and workshops.

Bloc.io - UX Design Apprentice

Sept 2017 - Oct 2018

Designed a mobile parking & navigation app that relays street parking availability. Conducted market assessment and generative research, prioritizing features. Iterated from wireframes to high-fidelity mockups using results from multiple rounds of remote and in-person usability tests.

Intel - Business Analyst + Product Owner

Jul 2015 - Jan 2017

Redesigned the sign-up experience to include company search and location-smart address input.

Developed storyboards, a system blueprint, and user flows for cross-functional groups and design agencies. Resulting changes improved data entry and reduced exit rates.

EDUCATION

Stanford University & Portland State University 2012 - 2014

HCI & Computer Science Courses GPA: 3.8/4

Syracuse University 2006 - 2010

BA Graphic Design + Math. Minor in IT GPA: 3.93/4
